

# AI tool for Researchers

Kahubi is a versatile AI tool developed by researchers for researchers.

It enables quicker editing, writing, reading and analysis.

# Academic use cases

## - how AI can help

In this short presentation, we cover the following areas of the academic writing process, and how Kahubi can be used for more effective writing, reading, and analysis.

**Reading**

...

**Writing**

...

**Methodology**

...

**Data**

Tip!

See the next pages for some of the AI templates you can use in your research work.

# AI for reading academic papers

With Kahubi, you can use preselect templates to perform a variety of research related tasks. The AI helps you when it comes to reading, writing, analyzing as well as tasks relating to methodology.

## Reading

Helps you read papers, interpret text, peer-review, simplify complex topics, etc.

## Writing

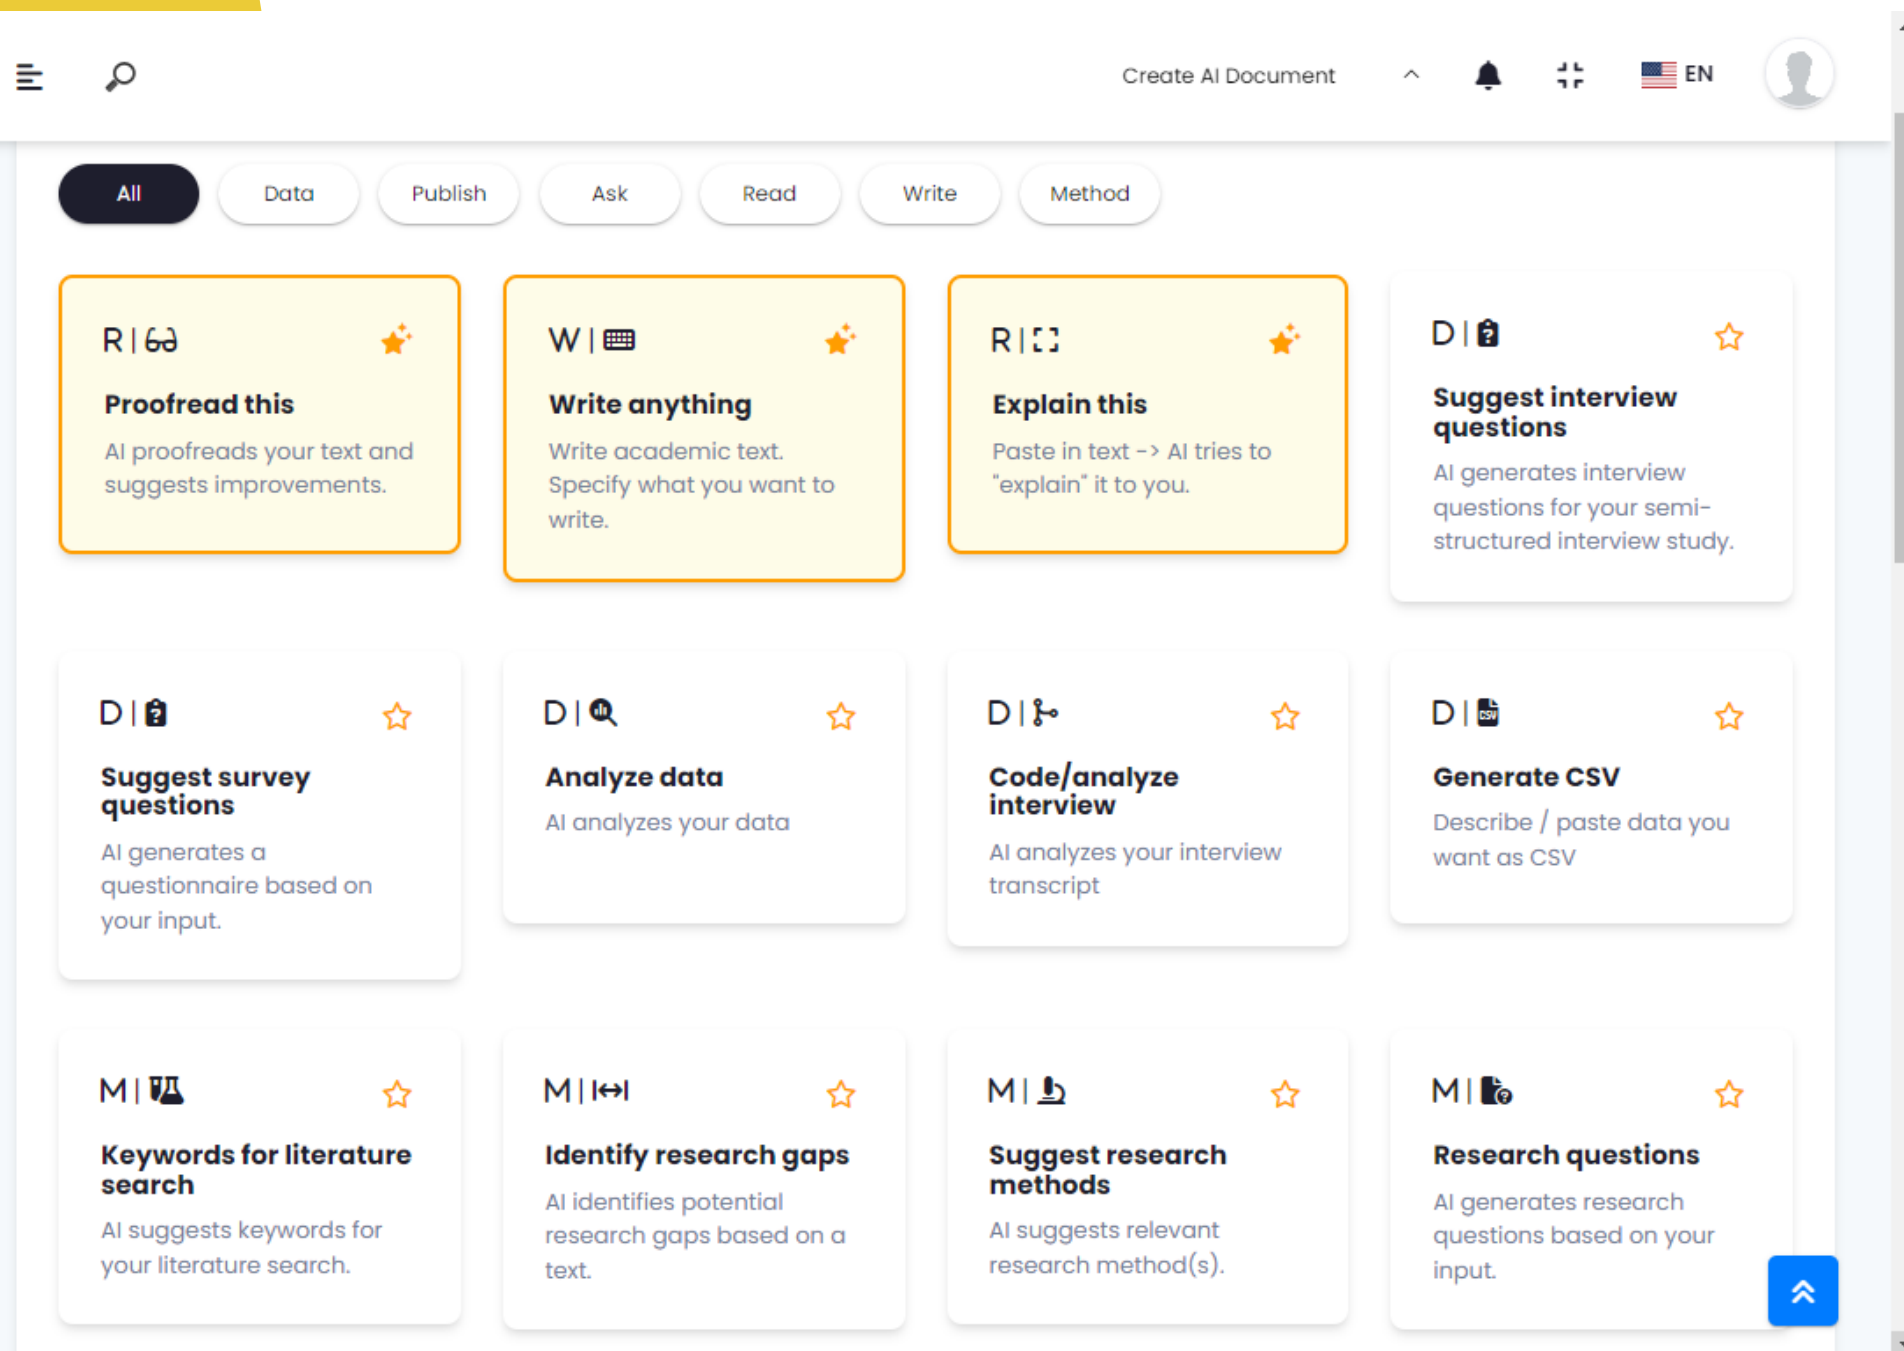

A writing aid, rewrite text, proofread, suggest text, etc

## Data

Analyze data, find insights, suggest interview/survey questions etc

## Method

Suggest research methods, theoretical framework, research gaps

# Reading

## Proofread text

AI helps you correct sentences, grammar and syntax. AI will also suggest ways to improve & build on your text.

## Explain text

Paste in text, and the AI explains what the section is about in simple language, including a glossary of what the terms mean.

## Opposite view

Paste in any text and the AI explain what the opposite view is in the research literature. Good for examining contested topics.

## Critique text

Use AI to provide a peer-review of any text. It offers an academic critique akin to a peer-review.

## Summarize text

Paste in pages of text and let the AI provide a summary. You could summarize entire papers (max 10 000 words).

### Tip!

Let AI be your peer-reviewer before you submit your draft, and use it to find potential mistakes in your text.

# Writing

## Generate academic text

Use the AI to get ideas or generate various parts of your paper, including

- Literature review
- Historical overview
- Method
- Abstract
- Result
- Discussion

## Write anything

Or use the AI for generic writing, tell it what to write, and it will write it, in an academic voice.

## Rewrite text

Simply paste in text you want rewritten, and the AI will rewrite it for you.

### Tip!

Kahubi is very useful in generating academic texts. However, it is important to still verify the accuracy of the text. Use sections that are relevant, and discard things that are not, and expand upon the generated text. Think of Kahubi as an assistant, it does not replace the writing process, instead, it aids you in your writing.

## Suggest interview questions

Describe your study and the AI returns suggested interview questions.

## Analyze data

Paste in data in any text format, and the AI will attempt to find correlations, insights and suggest ways to study it further.

## Suggest survey questions

Describe your study and the AI returns suggested interview questions.

## Code/analyze

Paste in your transcript, and the AI codes the interview, highlight key sections, themes and topics.

# Method

## Literature search

Generate keywords for your literature search.

## Research methods

Describe your study so the AI can suggest relevant research methods for your study.

## Research questions

Refine your research questions by enabling Kahubi to suggest potential research questions based on a description of your study.

## Identify gaps

Paste in text, let the AI figure out potential research gaps to explore.

## Theoretical framework

Describe your study so the AI can suggest a relevant theoretical framework for your study.

### Tip!

The more detailed you are in the input, the better the output tends to be. Instead of describing your study, you could also paste in sections from your text.

# Other AI templates

You can also use Kahubi to help with tasks related to publishing. Find high impact journals with good acceptance rates, relevant research conferences, plan your study and more.

<p>P   🧩 <span style="float: right;">★</span></p> <p><b>Research proposal</b></p> <p>AI generates a suggested research proposal.</p>	<p>P   🕒 <span style="float: right;">★</span></p> <p><b>Plan my study</b></p> <p>AI generates a time plan based on your input.</p>	<p>P   📖 <span style="float: right;">★</span></p> <p><b>Further research</b></p> <p>AI generates suggestions for future research direction</p>	<p>P   🐦 <span style="float: right;">★</span></p> <p><b>Suggest research conference</b></p> <p>AI suggests research conferences</p>

## Tip!

We regularly update Kahubi with new functionalities. To test out the current version, check out [kahubi.com](https://kahubi.com)

# AI chatbots

Similar to ChatGPT, Kahubi offers a versatile chatbot that can help you expand text, summarize text, and all other chat functionalities. Get the responses in real time. Ask anything.

### AI Chat Assistants

Find your AI assistant quickly! Get ready to explore our fantastic lineup of AI chat assistants

Search for your AI assistant...

- **English Translator**  
Paste text in any language --> Translates to English
- **Chat GPT**  
Your generic chat bot. Ask me anything.
- **LaTeX code**  
Paste math expression --> LaTeX code
- **Rewrite text**  
Paste text --> Rewrites it
- **Proofreader**  
Paste text --> Ai proofread it
- **Explain text**  
Paste text --> Ai explains it
- **Summarize text**  
Paste text --> Get summary
- **Expand text**  
Paste text --> Ai expands it

 **Proofreader**  
Paste text -> Ai proofread it

Nuclear power is the use of nuclear reactions to produce electricity. Nuclear power can be obtained from nuclear fission, nuclear decay and nuclear fusion reactions. Presently, the vast majority of electricity from nuclear power is produced by nuclear fission of uranium and plutonium in nuclear power plants. Nuclear decay processes are used in niche applications such as radioisotope thermoelectrics generator in some space probes such as Voyager 2. generating electricity from fusion power remains the focus of international research.

 Revised version:

Nuclear power is the use of nuclear reactions to produce electricity. It can be obtained through nuclear fission, nuclear decay, and nuclear fusion reactions. Currently, the majority of electricity is generated through the nuclear fission of uranium and plutonium in nuclear power plants. Nuclear decay processes are used in specialized applications such as radioisotope thermoelectric generators for space probes like Voyager 2. Generating electricity through fusion power is still the main focus of international research.

Some corrections (all changes may not be displayed):

- Deleted "Presently" before "the vast majority"
- Changed "from nuclear fission" to "through nuclear fission" and "of uranium and plutonium" to "from uranium and plutonium"
- Deleted "generating" in "generating electricity from"
- Added "is still" before "the focus of international research"

Suggestions:

The revised version of the text is clear and concise. It provides a brief explanation of nuclear power and mentions the different types of nuclear reactions used. However, it would be beneficial to expand on the advantages and disadvantages of nuclear power, as well as mention any potential risks and safety measures. Additionally, more information on the progress and challenges in achieving fusion power could be included to provide a well-rounded overview of the topic.

# Transcribe interviews in minutes, not hours.

1

## Upload audio

Upload your audio file from an interview that you have recorded.

2

## AI does the job for you

AI transcribes the entire interview for you (it can also translate if needed). It usually takes 1-2 min to finish with 95% accuracy.

3

## Analyze/code

Once your transcription is complete, you can paste in the transcribed results into the AI, and it will analyze the interview for you, highlighting key quotes, and finding insightful themes.

The screenshot displays the 'Ai Transcribe' web interface. On the left, there is a sidebar with the following elements: a header 'Ai Transcribe' with a sub-header 'Transcribe your audio files and translate them to English', a balance indicator 'Your Balance is 740 Minutes', a 'Drag & Drop your audio file or Browse' section with supported file formats (.mp3, .mp4, .mpeg, .mpga, .m4a, .wav, .webm) and a 'Max Audio Size: 25MB' limit, an 'Audio Description (Optional)' text area, an 'Audio Language (Optional)' dropdown set to 'Auto Detect', a 'Task Type (Optional)' dropdown set to 'Generate Transcription in source language', and a 'Workbook (Optional)' dropdown set to 'Select Workbook Name'. A blue 'TRANSCRIBE' button is at the bottom of the sidebar. The main content area features an 'Audio File' upload section with file icons, a rich text editor with formatting options (bold, italic, underline, list, link, text color, background color, indent, outdent, undo, redo), and a 'Transcription results' section. The transcription results are displayed in three paragraphs of text, with some words highlighted in red (e.g., 'Beloff', 'decompression chamber').

# ▲ Yearly pricing options for small groups ▼

We offer significant discounts for purchases involving groups. You get 30% discount if you choose the Standard plan, or a 50% discount if you choose our most premium Professional plan.

## Option A Standard Plan

**10-20 users**

~~\$190~~ → **\$133/year per user**

You get access to our standard plan with a **30% discount** per user.

Standard	Professional
<del>\$190</del> / year	<del>\$590</del> / year
Save 2 months!	Save 2 months
500,000 words / month	1,000,000 words / month
